Classroom News

Dear Families,

We are in the last two weeks of school. I can't believe how fast it has gone. I feel truly blessed to have been your child's teacher this year and to get to know your families. I was the classroom teacher, but each child in this classroom has taught me many things. All of which, I will use to grow as a teacher, and to make each year better in some way. Thank you so much for all of your support. This year would not have gone so well without you. I will miss you all and I hope you stop by to say hello next year.

This week we will be reviewing many of the skills that were covered this year across all subjects. We will also begin practicing the second grade math curriculum. We will be making a "Favorite First Grade Memories" class book. We will begin a bird study, and we will be using 3D objects to design a community. We also look forward to watching our caterpillars transform. We have many fun activities planned for this week! I hope you have a fun and restful summer!

Last week they really enjoyed: Learning about the Ascension of our Lord, watching our caterpillars grow, and our cupcake party in the park.

Reminders/Updates: Have a fun summer!!

St. Joseph School Mission Statement: "Children following God in Faith, Respect, Knowledge and Service."
